## **FREQUENTIS to deploy aviation message handling solution across India in one of the world's largest ever setups**

- **Frequentis to revolutionise aeronautical message handling system (AMHS) for Airports Authority of India (AAI)**
- **The AMHS replacement at two main centres in Mumbai and New Delhi stands out for its unmatched performance and resilience**
- **Over 60 sites and 200 user terminals make it one of the largest AMHS deployment for one single customer worldwide**

This remarkable project highlights a series of cutting-edge features, particularly focusing on an enhanced dynamic database system, expanded access points for user terminals, and improved performance and resilience. With over 60 sites across remote locations and approximately 200 user terminals, this project will provide increased performance and unmatched resilience, as well as being one of the largest deployed installations for a single customer worldwide, marking a global AMHS milestone.

This project showcases Frequentis' capabilities to combine expertise in aviation systems, along with the proficiency in project delivery and local support from partners. In India, Frequentis and Frequentis' Indian/Canadian partner Grintex have developed a unique mobile application to create a seamless, stand-alone device for flight planning. The app's user-friendly interface will ensure a seamless transition for pilots, airlines, and other airspace users already familiar with traditional user terminals, minimising training requirements and maximising productivity.

The Indian aviation industry's potential is immense, with rapid passenger growth and increasing air traffic demands. Frequentis aims to cater to this exponential growth by introducing its state-of-the-art air traffic management solutions.

"We are excited to collaborate with Indian partners and contribute to the nation's vision for a robust and self-sufficient aviation ecosystem. Frequentis is committed to leveraging its expertise and innovation to support India's journey towards a safer, more efficient, and technologically advanced airspace," states Constantin von Reden, Managing Director Frequentis Comsoft and member of the ATM Executive Board.

## About FREQUENTIS

Frequentis is a global supplier of communication and information systems for control centres with safety-critical tasks. The listed family company develops and markets its “control centre solutions” in the Air Traffic Management segment (civil and military air traffic control, air defence) and the Public Safety & Transport segment (police, fire brigades, emergency rescue services, railways, coastguards, port authorities). With a market share of 30%, Frequentis is the world market leader in voice communication systems for air traffic control. Frequentis is also the global leader in aeronautical information management and aeronautical message handling systems.

As a global player with around 2,200 employees (full-time equivalents/FTE), Frequentis has a global network of companies and representatives in more than 50 countries. Its head office is in Vienna, Austria. Frequentis' products, services, and solutions are used at more than 45,000 operator working positions in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2022, revenues were EUR 386.0 million and EBIT was EUR 25.0 million.

Wherever Frequentis' systems are used, safety-critical operators bear responsibility for the safety of other people and goods. The company also works towards a more sustainable future through its air traffic optimisation solutions.

## About FREQUENTIS Comsoft

In 2016, Frequentis Comsoft joined the Frequentis Group as its competence centre for AMHS, AIM, surveillance technologies and ATM systems. Frequentis Comsoft provides software-centric solutions covering a major part of the surveillance data chain: from distribution to processing to display.
