DIVOS 3 *log compact*

COMPLIANCE AUDIO RECORDING FOR SMALL & MID-SIZED SITES

Evolving in safety-critical environments demands accuracy, efficiency & reliability. Managing those challenges is all the more complex when it comes to multiple branch organisations or small to mid-sized independent sites. How minimising costs while complying with the latest technologies and regulations?

Why a DIVOS 3 *log compact*?

Impact studies regarding the economics of regulations have observed that, as technologies evolve, new regulations inevitably generate costs. To counteract this upward trend, multiple site organisation managers have to intensify cost-rationalisation efforts without compromising the effectiveness of safety and security. To equip smaller sites with a scalable, flexible and reliable compliance recording solution, Frequentis has created DIVOS 3 *log compact*.

Designed to fulfil the same mission-critical requirements as larger recorders, DIVOS 3 *log compact* remains cost-effective, scalable and user-friendly. As part of Frequentis product suite, DIVOS 3 *log compact* can be fully integrated into an "all in one" Frequentis solution deployment. With DIVOS 3 *log compact*, managers get the best for their organisations, caring for the bottom line.

Adaptable to your needs!

Flexible for branch organisations & up to mid-sized independent sites

DIVOS 3 *log compact* can be deployed:

- Either as a **standalone solution**, where it operates independently from any centre or other part of the organisation. You get the features you need and remain the manager from your system;
- Or as a **centrally administered architecture**, where maintenance, playback and archive are operated centrally. You make considerable savings by central management of your branches, whilst maintaining self-contained branch operation.

"Mission relevant grade"

DIVOS 3 *log compact* records and protects mission critical data reliability. It ensures compliance with current and upcoming legal and regulatory requirements through authorisation control and fingerprint.

Customisable

DIVOS 3 *log compact* suits your demands via customised Graphical User Interface and authorisation control. It supports your workflow and not the other way round!

A handful of features "all in a box"

Easy and flexible access for your authorised employees

Authorisation controlled browser-based interfaces ensure access from any workstation to DIVOS 3 *log compact* recordings and system functions (playback, monitoring, reporting and configuration).

Reliable recording storage and fast data reconstruction

DIVOS 3 *log compact* exceeds your reliability requirements through RAID storage, unique built-in test & optional duplication. DIVOS 3 *log compact* enables you to find & review recordings within a few seconds, insuring you peace of mind in time-critical situations. When deployed together with other Frequentis products, DIVOS 3 *log compact* benefits from additional search criteria, boosting your investigation capacity.

SAVE ON COSTS, NOT ON FEATURES!

MINIMISE YOUR TOTAL COST OF OWNERSHIP (TCO)

Small and mid-sized centres require the same functionalities and reliability levels as larger structures. Centres with up to 48 channels can now benefit from all advanced DIVOS features in the form of an affordable mission grade COTS recorder. As you needs grow, DIVOS 3 *log compact* can be expanded or upgraded easily.

Make savings, curving...

... Operational costs

DIVOS 3 *log compact* provides browser-based user interfaces that can be accessed from any station. No client installation is needed.

Cost Effective

... Maintenance costs

You can change or add any component during operation, saving money with enhanced uptime and system recovery. In case of a centrally administered structure, you also make considerable savings by central operation of your branches, whilst maintaining self-contained branch operation.

Scalable

... Your system footprint

DIVOS 3 *log compact* consolidates required COTS hardware into an all in one single server, reducing footprint and energy consumption. All your Frequentis products will fit into one single rack.

Economical

... Expansion costs

DIVOS 3 *log compact* offers a modular design to be upgraded & expanded easily with additional channels and functionalities to meet your upcoming requirements. Interface hardware, software, user interfaces and maintenance remain the same. Upgrades imply no additional training.

Life Cycle

... Expenses for your system

You get one single point of contact for all Frequentis products, minimising your system's life cycle costs, while synergies by combined maintenance reduce the Total Costs of Ownership (TCO).
