

# FREQUENTISTEC

**Technical Education Center** 

# iSecCOM R/B Maintainer Course

# (Level 0,1&2)

Target group	Location
Maintainers and system administrators	Customer site or Frequentis TEC (Vienna)
Language	Max. number of participants
English (unless otherwise agreed)	6
Duration	Course ID
7 days	DE0331

Participants will, through extensive practical exercises, learn how to perform scheduled and corrective system maintenance for iSecCOM RED/BLACK up to level 2.

## Course goals

Upon successful completion of this course, participants will be able to

- > understand the capabilities and security aspects of RED/BLACK iSecCOM systems
- $\rangle~$  identify and describe the system components and their functions
- > use standard and project-specific functions for radio and telephone communication
- $\rangle~$  use RED/BLACK operator positions including crypto-pooling and ECCM radios
- > identify and rectify faults
- $\rangle$  replace line replaceable units (LRUs) and put them back into service
- > maintain the radio and telephone directory
- $\rangle~$  adapt layouts and settings of operator positions
- > perform system administration tasks
- $\rangle$  set system parameters for both domains (RED and BLACK)
- $\rangle~$  run backup and restore procedures
- $\rangle$  optional: use the radio management system (RMS)

## Knowledge

It is assumed that participants

- $\rangle~$  have a good understanding of written and spoken English
- $\rangle$  have extensive knowledge of military ATC and/or C2 and telecommunication basics
- $\rangle$  have a good understanding of IP LAN & IP WAN infrastructure (L2, L3 switches, routers & firewalls)
- > are familiar with secure/non-secure data & comm. concepts, including cryptos and ECCM radios
- > are able to configure switches, routers and firewalls in command-line mode
- > have a good understanding of servers, virtualisation of applications and RAID configuration
- $\rangle~$  have extensive knowledge of Oracle databases and Java
- > have extensive knowledge of line characteristics/protocols of the radio & tel. line interfaces in use
- > have experience with Linux OS
- > have good knowledge of VoIP (SIP, RTP, QoS)

#### Qualifications

The following qualifications are necessary:

- > English language level (CEFR): minimum B2
- > Cisco CCNA certification or equivalent experience and/or 5 years' engineering experience in IT and networking environments
- > Red Hat Cert. System Admin. (RHCSA) or Linux Foundation Cert. Engineer (LFCE) or equivalent experience
- > Certified IP Telecom Network Specialist (CIPTS) certification or equivalent experience
- > Certified Telecommunications Analyst (CTA) certification or equivalent experience
- > VMware Certified Associate (VCA) or equivalent experience

## Training agenda

Day 1	Welcome   Health and safety   Course documentation overview   Introduction to the working environment   System architecture and services   OP overview   OP hands-on practice   System monitoring   Conclusion
Day 2, 3, 4	Review   Maintenance procedures   System administration   Conclusion
Day 5, 6	Review   Inspection processes and troubleshooting   Conclusion
Day 7	Case studies and best practices (instructor guided)   Summary and review   Student assessment   Assessment feedback   Student feedback   Student certification   Course closure
