

Vienna, September 2015

FREQUENTIS at the DSEI 2015: Booth S9-167

Frequentis will be exhibiting existing products and innovative solutions for control centres in safety-critical environments at the world's leading land, sea and air defence and security exhibition taking place from Tuesday 15 to Friday 18 September 2015.

Defence & Security Equipment International (DSEI) is the world's largest land, sea and air defence and security exhibition, bringing together senior international trade and military experts from across the entire supply chain in an optimal business environment. Experts from diverse sectors and different countries will attend the exhibition in order to fortify ties and learn about cutting-edge advances in technology, equipment and services, with the clear purpose of positioning their brand in this region of the world.

As an international supplier of communication and information systems for safety-critical applications and a global leader in voice communication, Frequentis is able to present a range of products and services that meet even the most diverse control centre needs. Visit the Frequentis booth to see our state-of-the-art technology and to experience our capabilities in the international defence and security market. Our focus will be individual solutions for control centres in safety-critical environments. In addition to an innovative Remote Tower solution, Frequentis is presenting the new 3020 LifeX IP-based integration platform with a suite of easy-in, easy-out applications designed to Frequentis's exacting standards as expected by customers across the globe.

About FREQUENTIS

Frequentis is an international supplier of communication and information systems for control centres with safety-critical tasks. These control centre solutions are developed and distributed by Frequentis in the business segments Air Traffic Management (civil and military air traffic control, and air defence) and Public Safety & Transport (police, fire and rescue services, emergency medical services, vessel traffic and railways). Frequentis maintains a worldwide network of subsidiaries and local representatives in more than 50 countries. The company's products and solutions are behind more than 25,000 operator positions in over 120 countries. With this extensive portfolio, Frequentis is the leading provider of voice communication systems ... all making our world a safer place every day!
