

FREQUENTIS to open UAE office serving the Middle East

Frequentis, the leading international supplier of communication and information solutions, will open a new office in Abu Dhabi. The offices will provide the region with a permanent sales and support service, further expanding the Frequentis global network and enabling continued growth.

Frequentis AG has over 70 years of experience in safety-critical communications, developing from a mid-sized Austrian business into a successful and international corporate group, providing solutions and products in approximately 140 countries, with subsidiaries in more than 50 countries. The company has been serving clients throughout the Middle East with tailor-made solutions for over 20 years, with the support of strong local partners.

Frequentis has a strong working relationship with most Middle Eastern customers, including providing centre tower automation and AIM and surveillance solutions for the UAE General Civil Aviation Authority (GCAA), fully IP voice communications and recording for the Saudi Air Navigation Service (SANS), and other voice communications and recording systems throughout the Middle East, as well as a maritime communications infrastructure for the Sultanate of Oman. Frequentis has also provided a C4I Centre solution for five public safety organisations in the Middle East, allowing full radio and digital TETRA and LTE integration.

The new office base will also develop Science, Technology, Engineering & Mathematics (STEM) capabilities into the Middle East. The STEM offering comes through Frequentis' experience and close cooperation with universities and government organisations in Europe, and especially Austria where the company is based, enabling knowledge transfer and local connections.

“The opening of our new Abu Dhabi office is an exceptionally important strategic step for Frequentis. I am confident that the establishment of a permanent regional base will not only further improve our ability to deliver excellence to our existing and future customers but will also create local jobs for the region. I previously worked for two years in the Middle East and as part of my personal commitment I am visiting the area in order to talk to customers and partners, culminating in my visit to the Dubai Airport Show”, says Frequentis CEO, Norbert Haslacher.

Frequentis is exhibiting at Dubai Airport Show, May 7-9, with UAE partner Bayanat on stand 6120.

About FREQUENTIS

Frequentis is an international supplier of communication and information systems for control centres with safety-critical tasks. These control centre solutions are developed and distributed by Frequentis in the business segments Air Traffic Management (civil and military air traffic control, and air defence) and Public Safety & Transport (police, fire and rescue services, emergency medical services, vessel traffic and railways). Frequentis maintains a worldwide network of subsidiaries and local representatives in more than fifty countries. The company's products and solutions are behind more than 25,000 operator positions in almost 140 countries. With this extensive portfolio, Frequentis is the leading provider of voice communication systems... all making our world a safer place every day!
