

FREQUENTIS and Bin Hilal Enterprises team to deliver mission-critical communication solutions in the UAE

Frequentis, with over 70 years' experience providing mission-critical communication, information and surveillance systems to the defence market, has partnered with Bin Hilal Enterprises to support the market demand for mission-critical solutions in the UAE.

Bin Hilal Enterprises is well-known for delivering state of the art technologies, products and services to the UAE defence sector. By partnering with Bin Hilal Enterprises Frequentis aims to increase its footprint in the defence market in the UAE.

One of Frequentis' key strengths in the civil domain, which is now gaining attention in the defence market, is its remote digital tower solution. "Remote air traffic control tower (RT) and digital tower solutions have already been tested and put into operation at civil airports around the world, but the potential for defence organisations is even greater. The Frequentis smartVISION system allows controllers to benefit from an enhanced view of the airfield, compared to the one from a conventional tower with additional features like object detection, tracking and infrared available.", says Hank Ruebenstrunk, Head of Regional Sales Unit Middle East.

In October 2019, Frequentis completed installation of its remote digital tower solution for Santa Cruz airfield in Brazil, making it the first such system in South America. Here 16 high-performance, Pan-Tilt-Zoom (PTZ) cameras located around the airbase feed data back to a 14-screen video wall in a bespoke remote tower facility, creating a 360-degree panorama view of the airfield. In addition, the US DoD are currently testing the mobile, deployable version of the Frequentis smartVISION system, and will begin testing the fixed version in March 2020.

"We are looking forward to supporting Frequentis, helping them to grow their technology base in the Middle-East, bringing their experience and mission-critical technology portfolio to the region.", says Humaid Al Ahaheri – Vice Chairman Bin Hilal Enterprises.

Frequentis will be attending Dubai Airshow from 17-20 November at booth #1358.

Left to Right: Hank Rübénstrunk – Managing Director Frequentis Middle East, William Hurst – Vice President Marketing and Sales Bin Hilal Enterprises, Peter Skiczuk – Vice President Frequentis Defence and Humaid Al Ahaheri – Vice Chairman Bin Hilal Enterprises sign partnership to deliver mission-critical communication solutions to the UAE.

About FREQUENTIS

Frequentis, headquartered in Vienna, is an international supplier of communication and information systems for control centres with safety-critical tasks. Such 'control centre solutions' are developed and marketed by Frequentis in the business sectors Air Traffic Management (civil and military air traffic control, air defence) and Public Safety & Transport (the police, fire brigade, ambulance services, shipping, railways). Frequentis operates a worldwide network of branches, subsidiaries and local representatives in more than 50 countries. Products and solutions from Frequentis can be found in over 25,000 operator working positions and in over 130 countries. Founded in 1947, Frequentis is, by its own estimation, the global market leader in voice communication systems for air traffic control with a market share of around 30%. Moreover, the Frequentis Group's systems are globally leading in AIM (aeronautical information management) and aeronautical message handling systems, as well as in GSM-R systems in the field of Public Transport.

The shares of Frequentis AG are traded on the prime market on the Vienna Stock Exchange and in the general standard on the Frankfurt Stock Exchange under the ticker symbol FQT (ISIN: ATFREQUENT09).
