

FREQUENTIS acquires Orthogon, a leading international supplier of air traffic optimisation solutions

- **Sustained reduction in CO₂ with Orthogon's system solutions (including cloud solutions) through optimised air traffic synchronisation**
- **Closing of the acquisition of the first of three entities under the purchase agreement with L3Harris Technologies**
- **Expansion of the global market for air traffic control and airports addressed by Frequentis**

“We are delighted that we could close the acquisition of Orthogon faster than expected. Orthogon's solutions extend our range of integrated air traffic management solutions,” says Frequentis' CEO Norbert Haslacher. “Together, we can now offer our customers an even more extensive range of products with higher performance and increased digitalisation level.”

Orthogon, which is based in Bremen, Germany, has been operating successfully in the air traffic control market for around 30 years. In future, it will trade as Frequentis Orthogon GmbH. The company is an innovative provider of air traffic synchronisation solutions for en-route, approach, and airport ATC centres. Its air traffic optimisation solutions can also help reduce air traffic emissions. As part of the Frequentis Group, it will continue to market its products, which will also be included in Frequentis' offering for remote digital towers and air traffic management centres.

Founded in 1987, Orthogon currently has about 80 employees and most recently generated revenue of around €10 million p.a. Orthogon will continue to be run by Frank Koehne, who has been its Managing Director since 2009. The purchase agreement was signed on 23 February 2021 and closing took place on 30 April 2021.

“We are delighted to become part of the Frequentis Group and contribute our long-standing expertise in air traffic optimisation. The stability of Frequentis Orthogon is an important criterion for continuing our business relationship with our international customers,” says Frank Koehne, Managing Director of Orthogon.

Together, the companies are optimistic about the future and anticipate growth in both the air traffic control and the airports business. This acquisition is especially successful for Frequentis as it has been endeavouring to obtain an interest in this market-leading company for more than 15 years.

The acquisition of the other two L3Harris entities (the Harris ATC Solutions business unit of Harris Canada Systems Inc., Gatineau, Canada, and Harris C4i Pty. Ltd., Melbourne, Australia) is expected to be completed in the coming months and is subject to regulatory approvals.

About FREQUENTIS Orthogon

Frequentis Orthogon GmbH (change of name has been filed with the commercial court) was founded in 1987 and is headquartered in Bremen, Germany. The company specialises in traffic optimisation solutions, traffic flow management, and visualisation solutions for air traffic management (ATM), air traffic control (ATC), and airports. Its international customer base includes system integrators, air traffic control organisations, and airports. Orthogon is certified under ISO 9001 2015. Its quality management system features additional safety management, including a development model based on the software safety standard for non-airborne ATM systems (EUROCAE ED-109A / RTCA DO 278A).

About FREQUENTIS

Frequentis, headquartered in Vienna, is an international supplier of communication and information systems for control centres with safety-critical tasks. Such 'control centre solutions' are developed and marketed by Frequentis in the business sectors Air Traffic Management (civil and military air traffic control, air defence) and Public Safety & Transport (police, fire brigade, ambulance services, shipping, railways). As a global player, Frequentis operates a worldwide network of branches, subsidiaries and local representatives in more than 50 countries.

Products and solutions from Frequentis can be found in over 35,000 operator working positions and in approximately 150 countries. Founded in 1947, Frequentis considers itself to be the global market leader in voice communication systems for air traffic control with a market share of around 30%. In addition, the Frequentis Group's AIM (aeronautical information management) and AMHS (aeronautical message handling) systems, as well as GSM-R systems for Public Transport are industry leading global solutions.

The shares of Frequentis AG are traded on the Vienna and Frankfurt Stock Exchange under the ticker symbol FQT (ISIN: ATFREQUENT09). In 2020, the Frequentis Group had about 1,900 employees worldwide and generated revenues of EUR 299.4 million and EBIT of EUR 26.8 million.
