

FREQUENTIS: Slovakian Defence Minister visits company headquarters in Vienna

Appreciated visit to the Vienna headquarters of the globally operating high-tech company Frequentis: Together with a high-ranking delegation, the Slovakian Minister of Defence Jaroslav Nad' convinced himself of Frequentis' performance as a supplier of solutions for safety-critical applications. The contribution of the Slovak Frequentis subsidiary to the successful growth of the company group was also acknowledged.

The Slovakian Air Force has been a Frequentis customer for several years: Within the scope of a comprehensive modernisation programme, Frequentis is responsible for equipping the Slovakian Air Force with NATO-compliant ground-to-ground and ground-to-air communication. During the visit to the company's headquarters, Minister Nad' was now presented with the wide range of innovative Frequentis communication and information solutions in the safety-critical area.

The Slovakian defence minister was particularly impressed by the demonstrations of the Frequentis Remote Digital Tower. This software solution allows remote air traffic control at smaller airports or airports located in hazardous areas. As a deployable system, it offers quickly available solutions for setting up temporary airfields. The Frequentis Remote Digital Tower is already being used successfully by several customers worldwide.

The important contribution that the Slovakian subsidiary makes to the development of the Frequentis Group was also positively emphasised by both sides. "What started 30 years ago as a small software office in Bratislava is now a strong independent company with about 140 Slovakian employees," said Hannes Bardach, Chairman of the Supervisory Board and majority owner of Frequentis AG. Minister Nad' also emphasised the importance of being able to offer solutions with a high proportion of value added from Slovakia globally.

Today, the Frequentis Group of Companies supplies more than 500 customers worldwide, in the segments Air Traffic Management (civil and military air traffic control, air defence) and Public Safety & Transport (police, fire brigade, rescue services, shipping, railways). The Bratislava company was founded in 1991 as one of the first Frequentis subsidiaries and has made important contributions to the growth of the Group over the past 30 years.

About FREQUENTIS

Frequentis, headquartered in Vienna, is a global supplier of communication and information systems for control centres with safety-critical tasks. Such 'control centre solutions' are developed and marketed by Frequentis in the business sectors Air Traffic Management (civil and military air traffic control, air defence) and Public Safety & Transport (police, fire brigade, ambulance services, shipping, railways). As a global player, Frequentis operates a worldwide network of branches, subsidiaries, and local representatives in more than 50 countries. Products and solutions from Frequentis can be found in over 35,000 operator working positions and in approximately 150 countries.

Founded in 1947, Frequentis considers itself to be the global market leader in voice communication systems for air traffic control with a market share of around 30%. In addition, the Frequentis Group's AIM (aeronautical information management) and AMHS (aeronautical message handling) systems, as well as GSM-R dispatcher working positions for Public Transport are industry leading solutions.

The shares of Frequentis AG are traded on the Vienna and Frankfurt Stock Exchange under the ticker symbol FQT (ISIN: ATFREQUENT09). In 2020, the Frequentis Group had about 1,900 employees worldwide and generated revenues of EUR 299.4 million and EBIT of EUR 26.8 million.
