

FREQUENTIS to deliver largest military voice communications system in the Middle East

Multiple Defence Forces, including Air Force, Joint Operations, Navy Operations, Air Defence, and National Guard, will receive Frequentis secure communication technology and will create the largest military communications system in the region.

The scope of the project includes over 130 controller working positions deployed on over 10 sites; interfaces for radios with radio remote control, telephone lines and advanced mission critical logging of voice and surveillance data. The project involves full installation and will also encompass mobile units for tactical operations.

“Frequentis has been our trusted partner in the region, working with in the field of secure communications for two decades. We are pleased to be working with them once more on what will be the largest military voice system in the region,” says the customer’s procurement responsible.

“We’re motivated to start this project as the scope extends to all Forces, not just those of the Air Force; we will also deliver mobile units for tactical operations,” says Peter Skiczuk, Vice President Frequentis Defence. “We look forward to delivering an exceptional system for the region which meets all of its current and future demands.”

With over 35 years working in the Defence sector and 75 years of existence in the safety critical industry, over 40,000 operator working positions worldwide are in use for control centre solutions.

About FREQUENTIS

Frequentis is a global supplier of communication and information systems for control centres with safety-critical tasks. The listed family-run company develops and markets its “control centre solutions” in the Air Traffic Management segment (civil and military air traffic control, air defence) and the Public Safety & Transport segment (police, fire brigades, emergency rescue services, coast guard, railways). With a market share of 30%, Frequentis is the world market leader in voice communication systems for air traffic control. Frequentis is also the global leader in aeronautical information management and aeronautical message handling systems.

In 2021 Frequentis acquired Melbourne-based C4i PTY Ltd, responsible for the VOICE C2 mission-critical Voice Communication Systems product range. C4i secure VCS is used by defence, governments, and industry in over 35 countries including for the US Air Force and Marine Corps, UK Ministry of Defence, Qatar Ministry of Defence and in the Air Defence segment of the Royal Australian Air Force.

As a global player with around 2,000 employees (full-time equivalents/FTE), Frequentis has a global network of companies in more than 50 countries. Its head office is in Vienna, Austria. Frequentis’ products, services, and solutions are used at more than 40,000 operator working positions in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2021, revenues were EUR 333.5 million and EBIT was EUR 29.0 million.

Wherever Frequentis’ systems are used, safety-critical operators can confidently bear responsibility for the safety of other people and goods. The company also works towards a more sustainable future through its air traffic optimization solutions.
