## **EUROCONTROL and FREQUENTIS continue to demonstrate trusted partnership**

- **Frequentis Comsoft to provide additional support for EUROCONTROL's Air Traffic Management (ATM) Surveillance Tracker and Server (ARTAS)**
- **Frequentis Comsoft has been EUROCONTROL's Industrial Partner for ARTAS since 2001**
- **Latest contract expands the cooperation for ARTAS evolution**

EUROCONTROL's ATM Surveillance Tracker and Server, ARTAS, is the most deployed tracker in Europe and one of the most advanced and successful surveillance data processing systems in the world. Frequentis Comsoft has been EUROCONTROL's Industrial Partner for centralised ARTAS maintenance and operational support since 2001 and is also a turnkey supplier of ARTAS systems.

"ARTAS has received continuous enhancements since its creation, and the trusted partnership between EUROCONTROL and Frequentis Comsoft has also developed steadily over the years. We are pleased to be supporting the further enhancement of this reliable surveillance tool and look forward to all the benefits this will bring for the user," states Constantin von Reden, Frequentis Comsoft Managing Director and Member of the Frequentis ATM Executive Board.

ARTAS was developed by EUROCONTROL, on behalf of its member states, and applies the latest multi-sensor tracking technology to deliver an outstanding level of accuracy and reliability using PSR, SSR, Mode-S, ADS-B and Multilateration surveillance sources. ARTAS acts as core engine for the European surveillance infrastructure, making it an important technology for current and future air traffic management demands.

In 2020, EUROCONTROL awarded Frequentis Comsoft a further five-year contract for support, but the two partners have now concluded another service agreement for additional support in the evolution, and continuous enhancement of the ARTAS tracker.

"The new service contract is another sign that ARTAS is in the best hands with Frequentis Comsoft. We greatly appreciate the cooperation with the team and thank them for their good ideas and tireless commitment," says Antonio Principe, EUROCONTROL ARTAS & SDDS Services Manager.

The Frequentis Comsoft team is also a turnkey supplier of ARTAS systems offering a comprehensive and field-proven ARTAS service portfolio to Air Traffic Service providers within EUROCONTROL member states, but also worldwide.

## About FREQUENTIS

Frequentis is a global supplier of communication and information systems for control centres with safety-critical tasks. The listed family company develops and markets its “control centre solutions” in the Air Traffic Management segment (civil and military air traffic control, air defence) and the Public Safety & Transport segment (police, fire brigades, emergency rescue services, railways, coastguards, port authorities). With a market share of 30%, Frequentis is the world market leader in voice communication systems for air traffic control. Frequentis is also the global leader in aeronautical information management and aeronautical message handling systems.

As a global player with around 2,100 employees (full-time equivalents/FTE), Frequentis has a global network of companies and representatives in more than 50 countries. Its head office is in Vienna, Austria. Frequentis’ products, services, and solutions are used at more than 45,000 operator working positions in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2022, revenues were EUR 386.0 million and EBIT was EUR 25.0 million.

Wherever Frequentis’ systems are used, safety-critical operators bear responsibility for the safety of other people and goods. The company also works towards a more sustainable future through its air traffic optimisation solutions.
