
FREQUENTIS wins contract for integrated operations and control centre system for the Thuringian state police

- **As general contractor, Frequentis is responsible for the performance of all system components**
- **The overall system is operated by Frequentis**
- **Control centre technology is ready for use for multimedia communications in the future broadband digital radio network**

Frequentis Germany has been awarded the contract to plan and supply the operations and control centre system for the police of the Free State of Thuringia. As general contractor, Frequentis is responsible for the installation and commissioning of all system components. These include Frequentis' 3020 LifeX communication system, an operations control system from T-Systems Information Services GmbH, and the IT and network infrastructure provided by Siemens AG.

With the integrated operations and control centre system, the Thuringian police will be provided with a state-wide standardised and future-oriented solution for emergency call handling and managing police operations in daily service and special situations.

“By awarding this contract, we have reached an important milestone in the implementation of the Thuringian police's digitalisation concept. We are now taking a major step towards modern, future-proof control centre technology. The new system will further optimise our operational coordination and thus ensure the improved safety of the citizens of Thuringia,” explains Thomas Quittenbaum, Vice President at the Thuringian state police directorate. The integrated communications system is already prepared for the connection to the future nationwide broadband digital radio system for authorities and organisations with security tasks.

“As general contractor, Frequentis has the overall responsibility for the successful implementation of this important project. We are ensuring that all components of the operations and control centre system interact perfectly. With the commissioned technologically mature, highly available, and secure solution, we are supporting the digital transformation of the state police of the Free State of Thuringia,” says Marcel Haar, Managing Director Frequentis Germany.

With this contract, Frequentis further expands the company's leading market position: police organisations in more than half of all German federal states already rely on the innovative technological and conceptual capabilities of the global corporation.

About FREQUENTIS

Frequentis stands for a safer world. Our solutions are used in our customers' command and control centres to help them make the world safer.

Frequentis is a world leader in high-tech solutions for Air Traffic Management, supporting both civil and military air traffic control organisations, as well as Public Safety and Transport, where police, emergency rescue services, fire brigades, railways, coastguards, and port authorities rely on our extensive portfolio.

The listed family business based in Vienna, Austria, drives innovative and sustainable solutions for safety and security in everyday life and in the safety-critical sector. Its air traffic optimisation solutions for air traffic control centres are contributing to reducing emissions.

As a global player with more than 2,400 employees (full-time equivalents/FTE), Frequentis has a worldwide network of companies in over 50 countries. Its products, services, and solutions are used in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2024, revenues were EUR 480.3 million and EBIT was EUR 32.1 million.
