

## **FREQUENTIS confirms sustainability commitment with new milestones**

- **Initial certification according to ISO 50001 for Energy Management**
- **Recertification of existing ISO standards confirms high quality and safety standards**
- **Science Based Targets initiative (SBTi) for scientifically grounded climate goals**
- **EcoVadis Bronze Medal secured again – improvement in all evaluation areas**

Frequentis is sending a strong signal for sustainable and responsible business practices: as part of a comprehensive recertification audit, the existing ISO certificates were confirmed – a clear indication of the consistent implementation of high standards in the areas of Quality Management (ISO 9001), Environmental Management (ISO 14001), Information Security (ISO 27001), and Occupational Health and Safety (ISO 45001).

A special milestone: for the first time, Frequentis was also certified according to ISO 50001 for Energy Management. This recognition underscores the commitment to a more efficient use of energy and a responsible utilisation of resources – an important step on the path to climate neutrality.

### **Scientifically grounded climate goals with SBTi**

By committing to the Science Based Targets initiative (SBTi), Frequentis is taking another step towards the future: the planned targets for reducing greenhouse gas emissions are based on the latest scientific findings and are independently verified by the SBTi. This demonstrates not only transparency but also leadership in climate protection.

### **EcoVadis Rating: bronze medal reaffirmed**

Frequentis also impressed in the current EcoVadis rating: once again, the company was awarded the Bronze Medal, with significant improvements in all four evaluation areas: environment, labour and human rights, ethics, and sustainable procurement. This places Frequentis among the top 35% of companies assessed worldwide.

“This recognition confirms that sustainability at Frequentis is not just a buzzword, but a central part of our corporate identity,” emphasises CFO Peter Skerlan, who is responsible for the ESG agenda on the Executive Board.

With this holistic approach, Frequentis aims to generate long-term positive impacts for the environment and society – while remaining economically successful.

## About FREQUENTIS

Frequentis stands for a safer world. Our solutions are used in our customers' command and control centres to help them make the world safer.

Frequentis is a world leader in high-tech solutions for Air Traffic Management, supporting both civil and military air traffic control organisations, as well as Public Safety and Transport, where police, emergency rescue services, fire brigades, railways, coastguards, and port authorities rely on our extensive portfolio.

The listed family business based in Vienna, Austria, drives innovative and sustainable solutions for safety and security in everyday life and in the safety-critical sector. Its air traffic optimisation solutions for air traffic control centres are contributing to reducing emissions.

As a global player with more than 2,500 employees (full-time equivalents/FTE), Frequentis has a worldwide network of companies in over 50 countries. Its products, services, and solutions are used in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2024, revenues were EUR 480.3 million and EBIT was EUR 32.1 million.

## About ISO (International Organization for Standardisation)

ISO is the world's largest developer and publisher of international standards. The network of national standards organisations from 174 countries has more than 25,860 standards in its portfolio, ranging from standards for traditional activities such as agriculture and construction to transport, medical devices, environment, safety, information and communication technologies, and standards for good practice and services.

For more information, please visit <https://www.iso.org>

## About the Science Based Targets initiative (SBTi)

The SBTi (Science Based Targets initiative) is a global organisation that helps companies set targets to reduce greenhouse gas emissions (GHG) in line with climate science and the goals of the Paris Agreement. Through the validation and publication of these targets, the SBTi promotes transparency, accountability, and effective climate protection across all industries.

## About EcoVadis

EcoVadis is an internationally recognised platform for assessing the sustainability performance of companies. It analyses and evaluates firms in four key areas: environment, labour and human rights, ethics, and sustainable procurement.

The assessments are based on documented evidence and international standards such as the UN Global Compact, ISO 26000, and GRI. In an annual certification, companies receive a score and a medal rating.
