FREQUENTIS announces preliminary figures for the first half of 2026: Significantly positive EBIT expected

In the first half of 2026, numerous milestones with an impact on revenue and profit were achieved, which had originally been planned for the second half of the year. This resulted in a corresponding shift in revenue and earnings into the first half of 2026.

Thanks to this positive performance, revenue for the first half of 2026 is expected to rise to around EUR 340 million, according to preliminary figures (first half of 2025: EUR 236.8 million). EBIT is expected to be in positive territory at around EUR 15 million in the first half of 2026 (first half of 2025: EUR -4.3 million).

Order intake is expected to rise to around EUR 360 million (first half of 2025: EUR 309.0 million).

The result for the first half of 2026 is attributable to the partial shift in the seasonal pattern that is otherwise typical for the business, whereby revenue and profit are usually higher in the second half of the year than in the first. This shift in the seasonal pattern is due to the accelerated progress of a few large-scale projects and cannot be regarded as sustainable.

The outlook for the full year 2026 (compared with the full year 2025) is therefore as follows:

- Increase revenues by about 15% (previously “about 10%”)
- Increase order intake (unchanged)
- EBIT margin of around 7.0% (unchanged)

The Half-year Financial Report 2026 will be published on 11 August 2026, as planned.

About FREQUENTIS

Frequentis stands for a safer world. Our solutions are used in our customers' command and control centres to help them make the world safer.

Frequentis is a world leader in high-tech solutions for Air Traffic Management, supporting both civil and military air traffic control organisations, as well as Public Safety and Transport, where police, emergency rescue services, fire brigades, railways, coastguards, and port authorities rely on our extensive portfolio.

The listed family business based in Vienna, Austria, drives innovative and sustainable solutions for safety and security in everyday life and in the safety-critical sector. Its air traffic optimisation solutions for air traffic control centres are contributing to reducing emissions.

As a global player with more than 2,600 employees (full-time equivalents/FTE), Frequentis has a worldwide network of companies in over 50 countries. Its products, services, and solutions are used in around 150 countries. Shares in Frequentis are traded on the Vienna and Frankfurt stock exchanges; ISIN: ATFREQUENT09, WKN: A2PHG5. In 2025, revenues were EUR 580 million and EBIT was EUR 47 million.
