

	<b>44+</b> nation-wide safety-critical networks	<b>250,000</b> global networks users
	Spanning <b>5</b> continents	
	<b>33%</b> of the world safer with Frequentis networks	

Maintaining the highest level of safety while scaling capacity levels and improving cost competitiveness.

World's first ED-137B compliant hybrid network solution – IP, TDM and VSAT

- + Intelligent routing & control
- + Scalable networks
- + Situational awareness

Highest end-to-end performance  
Enhanced Safety & security  
Reduced TCO

**Act before failure**  
Brown-out detection

**End-to-end path diversity**  
Deterministic communication flows

**20 ms** path switch over

up to **90%** bandwidth reduction

**99.9999%** service availability
