Spotlight on success

Defence - Royal Australian Air Force (RAAF), Australia

Frequentis is the incumbent in RAAF Air Battle Management Systems, and has also provided a nationwide Air Defence Network (ADGE), mobile ATC towers and voice recording systems.
Frequentis is delivering end-to-end IP communication systems and airfield management systems (OneSKY) for RAAF sites to help create a unified solution to Australia's future air traffic management needs.

Air Traffic Management - Airservices Australia

Frequentis is a trusted voice communications partner for Airservices, and has provided tower communication and control systems for multiple locations, voice recording systems, and a nationwide VCX network.
Frequentis is as well delivering end-to-end IP communication systems and airfield management

systems (OneSKY) for Australian Airservices sites to help create a unified solution to Australia's future air traffic management needs.
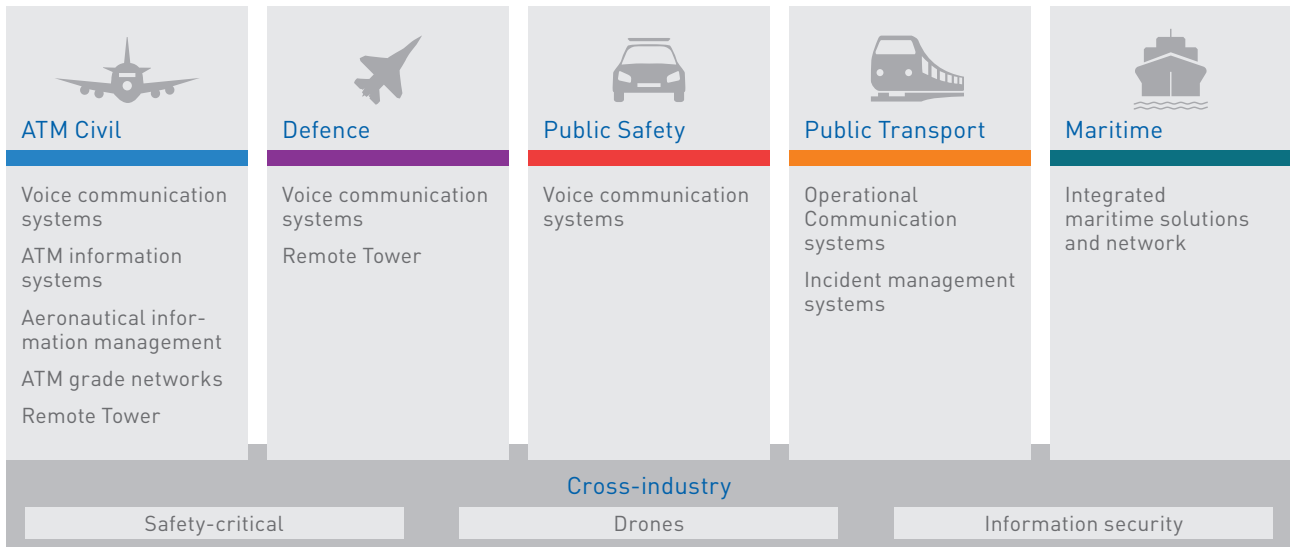

Public Transport - Sydney Trains, Australia

Frequentis provided a Digital Trains Radio System with 102 dispatcher terminals and a Rail Operations Centre Incident Management System.

Airways New Zealand

Provided New Zealand with communication systems and a nationwide ATC backbone based on VCX technology. Provided electronic flight strips and tower automation systems in 19 ATC towers across New Zealand. Installed a remote and virtual tower demo system at Auckland International Airport.
