

## iSecCOM R/B Operator Course

<b>Target group</b> Operators, supervisors and system administrators	<b>Location</b> Customer site or Frequentis TEC (Vienna)
<b>Language</b> English (unless otherwise agreed)	<b>Max. number of participants</b> 8
<b>Duration</b> 1 day	<b>Course ID</b> DE0111

Participants will be given a high-level overview of the system and will acquire knowledge of features and functions of the operator position through extensive practical exercises, ensuring that they are able to correctly use the iSecCOM RED/BLACK operator position.

### Course goals

Upon successful completion of this course, participants will be able to

- › understand the overall system concept of RED/BLACK iSecCOM
- › operate the RED/BLACK operator positions in both domains
- › locate and name all operator position components
- › use standard and project-specific functions for radio and telephone communication
- › control and use ECCM radios (TRANSEC)
- › control and use ciphered channels (COMSEC)
- › create a qualified error report for maintenance personnel

### Knowledge

It is assumed that participants

- › have a good understanding of written and spoken English
- › have good knowledge of military air traffic control and/or command and control (C2)
- › have a good understanding of telecommunication basics

## Qualifications

The following qualifications are necessary:

- › English language level (CEFR): minimum B2
