# OUR TECHNOLOGY

## True context-based platforms

Regola's control room solutions are designed to support safety-critical services, public and private control centres, health authorities and civil protection organisations.

**Whatever your context, we have the solution.**

## Top-level domain knowledge

We work closely with domain experts during the design, testing and tuning process. As a member of the **Frequentis Group**, Regola can bring an enormous technological expertise to complex control rooms requiring comprehensive response to critical events.

## mission

We aim to bring the inventiveness and practical sense of the Italians to Public Safety technology. We serve our customers under a strict code of ethics, acting as collaborative and flexible experts.

We drive the market with innovative solutions which inspire our competitors. Our exclusive **hybrid technology** releases our customer from choosing between SaaS, Cloud and on-premise licensing models. **Adopt just what you really need, when you exactly need it.**

The integration of Regola and Frequentis solutions offers the market maximum completeness in terms of functions and workflow coverage. **Using a single, complete platform reduces costs and avoids data duplication.**

## Innovation

## End-to-end software solutions

We are proud to belong to the best part of Italy, the part that has made Italians famous for their ability to invent, the sartorial quality of their products and their propensity for dialogue and exchange of experiences.
