LifeX Companion App: deliver dedicated, efficient public service, on the go

The application that complements **3020 LifeX™**

Introducing LifeX Companion App

▶ Call taking and handling

The LifeX Companion App allows users to: accept or reject incoming calls, initiate outgoing calls, put calls on hold, and hang up active calls.

▶ Talk group call handling

The LifeX Companion App allows its users to converse not only with Telephony but also with Radio thanks to Push-to-Talk button. A playback component is also available within a talk group call history.

▶ Simple, efficient call handover

Seamless handover of the call from one position to another with a single click; from workstation (desktop) to mobile (android smartphone or tablet).

▶ Familiar user interface

Users enjoy the similar and well-known look and feel of the LifeX Companion App desktop version. App works only with Android OS.
